Office Action Summary

Art Unit: 1645

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 37-46, drawn to methods of enhancing a protective immune response using a non-toxic double mutant of pertussis toxin, classified in class 424, subclass 282.1.
 - II. Claims 47-54, drawn to vaccine compositions comprising as the adjuvant a non-toxic double mutant of pertussis toxin, classified in class 424, subclass 282.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the vaccine adjuvant composition as claimed can be used alone as an antigen to make antibodies to pertussis toxin for use in immunotherapy methods or the vaccine composition can be used in methods of intramuscular or oral vaccination processes.
3. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
